PROFESSIONAL SUMMARY

With over 4 years of hands-on experience in building modern, user-centric web applications, I specialize in full-stack development with a strong focus on frontend technologies such as React, Next.js, and Drupal. At Credence and in previous roles, I have excelled in agile environments—delivering scalable solutions and intuitive user experiences for clients ranging from startups to established tech firms. I'm passionate about remote-first work cultures and believe in leveraging technology to connect, collaborate, and innovate from anywhere in the world. Let's connect if you're looking for a developer who's committed to quality, efficiency, and continuous learning.

PROFESSIONAL EXPERIENCE

Consultant, Full Stack Developer, Bestinet Sdn Bhd, Kuala Lumpur

August 2024 – Present

- Developed and maintained web applications using NextJS, Typescript and TailwindCSS. - Implemented integration with microservices API which is in Java Springboot. Planned and implemented new features and improvements. - Maintain/update/fix web pages using Drupal CMS. - Automated build, test and deployment of pipelines using Gitlab and Jenkins. - Using Agile methodology for daily workflow with team

Technologies: NextJS, TypeScript, TailwindCSS, Drupal CMS, GitLab, Jenkin, Docker

Mid-level Developer, Nematix Sdn Bhd, Seri Kembangan

August 2023 – August 2024

Built responsive web applications using Typescript and React. Collaborated with designers to implement user-friendly interfaces. Developed Interactive Data Visualization dashboards using React Charts and CubeJS. Implemented GIS related features using Google Maps API and Kinetica.

Technologies: React, TypeScript, CubeJS, Google Maps API, Kinetica, Supertokens, Supabase

Front End Developer, REKA Inisiatif Sdn Bhd, Kuala Lumpur

September 2021 – August 2023

Developed and maintained web applications using ReactJS and Bootstrap. Implemented authentication and authorization using Firebase Auth. Developed and maintained RESTful APIs using Firebase Cloud Functions. Developed backend services using NodeJS and Express.

Technologies: React, Bootstrap, Firebase, NodeJS, Express, Stripe, MongoDB

Software Developer, Elm Lab Sdn Bhd, Beranang

February 2020 – April 2020

Heavily involved in the development of the landing page to onboard new users of the system. Developed the front end interface and integrated with RESTful API. Ensured deliverables and tasks were completed on time for project delivery date.

Technologies: HTML, CSS, JavaScript, RESTful API

KEY PROJECTS

Interactive Portfolio Website - Full-stack Developer (Personal Project)

2 months

A responsive, interactive portfolio showcasing my work with dynamic layouts, animations, and advanced React components.

Outcome: The result is a portfolio that not only presents my work effectively but also serves as a living demonstration of my technical skills, UX sensibilities, and attention to detail in frontend development.

Technologies: React, TailwindCSS, React Grid Layout, ThreeJS

Live Demo: <https://abdulmuhammad.my> | Source Code: <https://github.com/abdulmuhammad-work/Project-Chimera>

SERV Sfera Auto - Frontend Developer (Sfera Auto)

6 months

A comprehensive web app for auto workshop management with secure authentication and role-based access control

Outcome: The application resulted in a reduction in administrative tasks, improvement in customer satisfaction, and an increase in revenue for workshop owners through better inventory management and appointment scheduling.

Technologies: ReactJS, Firebase, Bootstrap, Cloudfunction

Live Demo: <https://business.sfera.ai>

Stripe Payment Server - Backend Developer (Internal Project)

3 months

Back-end API for the payment system to integrate the payment of our various apps with the Stripe payment system.

Outcome: The system has processed transactions, reduced payment-related customer support tickets, and simplified financial reconciliation processes.

Technologies: ExpressJS, NodeJS, MongoDB

Autonomous Vehicle Dashboard - Frontend Developer (Automotive R&D Department) 4 months

Tasked with developing the dashboard for displaying data that was pulled from our autonomous vehicle

Outcome: The dashboard improved debugging efficiency, and became an essential tool for the autonomous vehicle development team.

Technologies: ReactJS

Forklift Management System Integration - Integration Specialist (Manufacturing Company)

5 months

Project scope is to integrate data from our system to client old system

Outcome: The integration increased warehouse efficiency, provided previously unavailable analytics on forklift utilization, and extended the useful life of the client's existing systems.

Technologies: React, Firebase

EDUCATION

Bachelors Degree in Mechanical Engineering

January 2009 – January 2014

Universiti Teknologi Petronas, Perak, Malaysia

CERTIFICATES

Full Stack Web Development Bootcamp

Malaysian Global Innovation & Creativity Centre (MaGIC)

Functional Programming in Erlang

University of Kent

[View Certificate](#)

TECHNICAL SKILLS

Frontend Development:

React, TypeScript, NextJS, TailwindCSS, JavaScript, HTML5/CSS3

Backend Development:

NodeJS, Express, Firebase, MongoDB, Supabase

Tools & Technologies:

Git, GitLab CI/CD, Jenkins, Figma

LANGUAGES

Bahasa Melayu (*Native*) **English** (*Proficient*)
